DETAILED ACTION

Response to Amendment

1. This action is responding to application filed 4/13//2006. Claims 1-15 and 18-33 are canceled. Claims 16, 17, and 34 are independent and allowed.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for patentability and/or confirmation of the claims found patentable in this reexamination proceeding:

Current prior art discloses a copyright protection system with processing rights and visual display capabilities. Current prior art discloses the capability for the development of a customizable windows display with the display consisting of icon objects.

However, the current prior art does not specifically disclose "... a copyright protection system wherein a process right is limited to a number of executions ... ", OR "... display unit (display means) operable to display on the screen as many icons as the number of executions specified by the process right ..." (see Applicant Remarks dated September 2, 2005 Page 3, Lines 8-9; Page 5, Lines 20-22) So as indicated by the above statements, Applicant's arguments have been

considered persuasive, in light of the set of claims with limitations as well as the enabling portions of the specification.

Any comments considered necessary by PATENT OWNER regarding the above statement must be submitted promptly to avoid processing delays. Such submission by the patent owner should be labeled: "Comments on Statement of Reasons for Patentability and/or Confirmation" and will be placed in the reexamination file.
